*European
Application*

Dear Sirs,

re: European patent No. 0.698.162 (Appl.No. 94915725.9)
in the name of: VÄLINGE ALUMINIUM AB.
OPPOSITION.

Further to our notice of opposition filed on 4 January 1999
(translation in English filed on 14 January 1999), in the name of
Unilin Decor NV, we would like to add following additional relevant
prior art document to the opposition:

[REDACTED]

This document discloses prior art which is comparable with the prior
art already disclosed in US 4.426.820, and consequently the same
arguments are valuable.

Furthermore, this document also discloses the feature that the locking
strip may be formed out of a material which is different from the
material of the panel, similar as the embodiments shown in the drawings
of the opposed patent.

NL 7601773.

NL 7601773 discloses a building panel, more particularly a wall panel,
which is comparable with the prior art already disclosed in
DE 2.917.025, and consequently the same arguments are valuable.

BEST AVAILABLE COPY

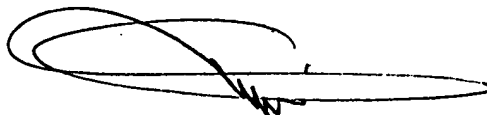

JP 5-148984.

JP 5-148984 discloses a panel clearly showing all features of at least claim 1 of the opposed patent. The coupling shown in this document is comparable with the prior art already disclosed in WEBSTER'S, and therefore the same arguments are valuable.
